

Full Arch Immersion Training Program

The full-arch dental implant immersion is a **1-year program with three 2-day sessions** with comprehensive review of the principles important in establishing a successful full arch therapy practice. You will also receive monthly updates in between the sessions. You will learn the fundamentals of full arch treatments, how to set up your team and office for success and the key marketing strategies to generate leads. You will then learn how to qualify the candidates and how to make the right referral if working in a team model. Next, you will learn about necessary records and diagnostics to help form a treatment plan specific to the needs of your patients. Finally through a coordinated team approach, the plan is executed providing the necessary surgical and restorative treatments. Finally, you will learn the current practices in implant hygiene and maintenance to keep you patients implants healthy.
