

# H. Ryan Kazemi, DMD

**Practical. Visual. Immediately applicable.** Dr. H. Ryan Kazemi helps clinicians make better decisions, prevent complications, and achieve more predictable outcomes in Dentoalveolar surgery, implant dentistry, grafting, and comprehensive patient care.

H. Ryan Kazemi, DMD is a board-certified oral and maxillofacial surgeon, educator, and speaker known for translating complex clinical concepts into practical strategies that clinicians can put to work immediately.

With nearly three decades of experience in clinical practice, Dr. Kazemi brings a real-world perspective to dental implant therapy, bone and soft tissue grafting, surgical complications, comprehensive treatment planning, and practice development. His programs focus not simply on what works, but on the critical decisions, techniques, and workflows that help clinicians achieve more predictable outcomes, reduce complications, and create treatment experiences that patients value.

Dr. Kazemi is known for his energetic, engaging, and highly visual presentations. Through clinical photography, video, case-based learning, and step-by-step protocols, he makes complex topics understandable, relevant, and immediately applicable. His goal is simple: attendees should leave with ideas they can use in their practices the very next day.

He is the founder and CEO of Kazemi Oral Surgery & Dental Implants in Bethesda, Maryland, where he maintains a full-time clinical practice. He is also the founder and director of Facialart Dental Forum, an educational platform created to advance collaborative learning among dental professionals. Through lectures, courses, podcasts, videos, and online education, he has shared his clinical and practice insights with dentists across a wide range of experience levels.

Dr. Kazemi received his dental degree from the University of Pennsylvania School of Dental Medicine, completed a general practice residency at Albert Einstein Medical Center, and completed his oral and maxillofacial surgery training at Washington Hospital Center in Washington, DC.

His professional interests extend beyond private practice. For more than 20 years, Dr. Kazemi has been involved in the care of professional athletes, including serving as an oral surgery consultant to D.C. United and providing oral surgical care for athletes associated with U.S. Soccer and the Washington Spirit.

Outside dentistry, Dr. Kazemi is a passionate endurance athlete who has completed more than 160 triathlons, including five Ironman competitions. He brings that same commitment to preparation, continuous improvement, and performance to his clinical practice and educational programs.
